Crossbow laws on Brazil:

Gun scopes are restricted products in Brazil. Some cops don't know the difference between gun scopes and crossbow scopes. As long your crossbow don't have one, you will not have any problem. If you have and come without any supervision there is a small chance you can have problems by mistake. In such a case stress to the revenue agent that you are transporting a Crossbow scope and not a Gun scope - it may work out . Carrying of Crossbows and bolts by themselves is completely legal in Brazil.

Visa laws in Brazil:
